About Workshop

The workshop aims to provide participants with essential knowledge and skills in Lean Six Sigma methodology, a data-driven approach to process improvement widely used in the industry. The workshop is expected to cover key concepts of Lean Six Sigma, including process optimization, waste reduction, and quality enhancement. Participants will likely gain insights into how these principles can be applied specifically within corporate settings.

Lean Six Sigma is a skill development program that helps organizations improve efficiency, reduce costs, and enhance customer satisfaction by streamlining processes, eliminating waste, and minimizing defects. It provides a structured approach to problem-solving, enabling businesses to achieve significant and measurable improvements in quality and performance.

Lean Six Sigma certification demonstrates valuable skills in process improvement, problem-solving, and data analysis, making individuals more attractive to employers.

The training equips individuals with the skills to lead process improvement projects and teams. It provides a structured approach to problem-solving, enhancing individuals' ability to identify and resolve issues effectively.

About the Speaker

An International corporate trainer, possessing 23 years of experience in process excellence and quality management within the corporate sector. Dr. Saxena has successfully implemented Lean Six Sigma methodologies in over 25 organizations across the United Kingdom, Europe, the Middle East, and India.
